Section 4: Reading Comprehension Passages

Directions (Qs. No. 76-100): Study the passages below to answer the questions that follow each passage.

PASSAGE-I

Though he makes Biblical references throughout "The Raven," Poe does not allude to the Bible because he is religious. Rather, he does this because he wishes to invoke the Bible's dramatic and philosophical weight. For instance, in line 89 the narrator asks the raven, "Is there is there balm in Gilead?" In ancient Arabia, the balm of Gilead was a salve produced from the tree *Commiphora gileadensis*. The balm was used to treat the dry, scratchy skin common in Arabia's desert climate. (The substance currently marketed as "balm of Gilead," a compound made from the gum of the North American balsam poplar tree, is unlikely to be the subject of Poe's reference.) The balm is more famous, however, because of its mention in the book of Jeremiah, a reference that readers during Poe's time would have easily recognized. As God punishes Jeremiah's people for their years of sin and disobedience, Jeremiah utters the phrase "is there no balm in Gilead?" The meaning of Jeremiah's question is not literally "is there an ointment that can heal our skin," but something more philosophical: "Is there anything we can do to relieve the suffering of God's punishment?" This philosophical question about the nature of relief from suffering is the one Poe invokes in "The Raven." The narrator is suffering greatly from the loss of his lover Lenore, and this suffering seems hopeless until the mysterious raven appears. The narrator interprets the raven as an omen of Lenore's future return, but Poe's reference to the balm of Gilead signals to the reader that the narrator's hope is futile. Just as Jeremiah's people had no hope of evading God's power or punishment, so does the narrator have no hope of reuniting with his lost Lenore. Furthermore, by comparing the profound suffering depicted in the book of Jeremiah to the narrator's pining for Lenore, Poe emphasizes just how delusional the narrator really is.

76. The author most likely places the sentence "The substance currently marketed as 'balm of Gilead, a compound made from the gum of the North American balsam poplar tree. is unlikely to be the subject of Poe's reference" in parentheses because it represents:

- A. the main idea of the passage
- B. a direct quotation from another source
- C. a departure from the main idea
- D. a controversial statement

77. In the passage given the word "Salve" is a synonym of:

- A. ointment
- B. solvent
- C. salvation
- D. none of these

78. As used near the end of the passage, which is the best synonym for futile?

- A. inaccessible
- B. pointless
- C. immature
- D. reckless

79. Based on information in the passage, it can be inferred that the author would most likely characterize Poe's attitude toward suffering in "The Raven" as:

- A. religious
- B. disrespectful
- C. delusional
- D. philosophical

80. The author argues that Poe mentions the balm of Gilead in order to:

- A. demonstrate his own religious convictions
- B. describe how dry, itchy skin was treated in Arabia's desert climate
- C. emphasize the delusional nature of the narrator
- D. argue that the narrator's suffering is universal

81. Based on information in the passage, it can be inferred that:

- A. readers during Poe's time were more likely to have read the Bible than today's readers
- B. the book of Jeremiah contains the most profound depiction of suffering in the Bible
- C. ravens are often interpreted as an omen foreshadowing a lover's return
- D. the narrator will eventually be reunited with his lost love, Lenore

PASSAGE-II

In one of the most rousing pamphlets of all time, Thomas Paine expounded on the need for American independence. It was "common sense," Paine alleged, forging his place in the pantheon of America's founders alongside such luminaries as Jefferson, Washington, and Adams. However, unlike those three men, Paine did not enjoy celebrity at the time of his death. Instead of being lionized, Paine was vilified by the very same individuals who once passed his pamphlet around as the gospel truth. But it was not Common Sense that got him excommunicated from the American canon; rather, it was his final work, The Age of Reason. To understand The Age of Reason, one needs to understand the context. After the Revolutionary War, Paine returned to his native England before his controversial, pro-French Revolution leanings made him increasingly unpopular. Paine immigrated to France, where he was so revered that he helped draft two separate French constitutions. However, the French Revolution was a far more violent and turbulent conflict than was the American Revolution, with dozens of leaders jockeying for power and killing each other to get it. Paine ended up in prison during one fluctuation of power but turned this vicissitude into an opportunity. It was while he was in prison that Paine wrote The Age of Reason, his religious text.

The Age of Reason is not an inherently atheistic text, though that is how it was interpreted.

Rather, the text espouses the same religious ideals that defined the Enlightenment, especially those ideals of the French Revolution, with its disestablishment of the Catholic Church as a national institution. Paine returned to America in 1802 and quickly fell out of favor in the new nation. Americans saw *The Age of Reason* as expressly anti-Christian, even though the actual philosophy of the text is closer to the deism practiced by Thomas Jefferson and other Founding Fathers. But America of 1802 was very different from the America of the Revolution, as the Second Great Awakening was just rising. In this new, devoutly Protestant nation, men like Paine were not welcome, nor would have men like Jefferson been, if Jefferson had not adapted to the times and modified his public statements on religion. Jefferson, unlike Paine, had the good sense-politically speaking to not publish his religious beliefs. Thus, Jefferson, unlike Paine, was able to publicly, at least, keep up with the times. Paine, on the other hand, was ostracized and denied the corridors of political power he had once helped make possible. Ultimately, Paine was punished for being an anachronism in a world that passed him by. In 1809, Paine died in New York, largely forgotten and certainly not celebrated. And today, while Americans commemorate *Common Sense*, most school children know nothing of the man who wrote it.

PASSAGE-III

Ever hear that John F. Kennedy was assassinated by someone other than Lee Harvey Oswald? Or how about the fact that the United States government has been harboring extraterrestrials and their advanced technology at Area 51? Or-my favorite for its sheer

lunacy-that the moon landing was staged in Hollywood? You might laugh at these theories, or like millions of Americans, you might believe them wholeheartedly. Regardless of their veracity, they exist and proliferate each day, and the Internet has only helped to promulgate them.

So where do they come from? Well, in a literal sense, they come from people asking questions and seeking answers. But in a more figurative sense, they come from the experience of not knowing, the great void created by a dearth of certainty. There are several questions about the Kennedy assassination, enough so that several government panels (most notably the Warren Commission) have investigated it; there have been several thousands of reports of UFO encounters (not to mention an equally absurd number of television shows about aliens); and there are aspects of the moon landing that seem too good to be true. But none of these questions necessarily hint at something nefarious or sinister. Rather, they demonstrate that these events are all too real. Nothing in life is certain, and nothing completely adds up. Sure, we'd all prefer major historic events to have the certainty of a sunrise, but there's the rub: most of us do not really know why the sun rises or even, with certainty, that it will rise tomorrow. But a sane person does not question the sunrise, though that same person will wonder about the trajectory of a bullet in Dallas. None of this is to say that one should not ask questions. Rather, one should ask questions of everything! We should know who shot JFK, whether there are aliens, and whether the Illuminati control everything. Yet, this is impossible. We can no more know these things than we can know who specifically invented the wheel. So, rather than making up theories to explain away the lacuna of facts, we should simply accept the fact that we will never know absolutely everything about anything. Continue asking questions, but don't make up ridiculous answers for them. Because the ultimate problem with conspiracy theories is that they don't answer any questions; they merely explain away gaps of knowledge with pseudoscience.

Put differently, no one is really sure why cats purr, but that doesn't mean that cats do not purr. There does not need to be a why for every what.

92. Based on its use in paragraph 1, it can be inferred that veracity belongs to which of the following word groups?
